Right or left-hand rotation
 Capacity 4 to 42 mm

Ceramic is the future of fine deburring.
Be one of the forerunners.

KOPAL CERAMIC for plastics and other materials

2 ceramic knives Ref. CC-010
(6 x 26 and 15 x 34 mm blades)

With this new technology, you'll have gold in your hands

- Uniform finishing
- Does not cut into the material
- Biocompatibility
- Safe deburring
- High-tech ceramic
- Wide knife-edge
- Ergonomic handle

(6 x 26 mm blade) Ref. CC-003
Ceramic knife CC-006
Ceramic knife (3 pieces)

Handle moulded directly onto the ceramic blade (with suspension eyelet)

(15 x 34 mm blade) Ref. CC-004
Ceramic knife CC-008
Ceramic knife (2 pieces)

Handle moulded directly onto the ceramic blade

You will experience a feeling of extreme precision, of ultra-smoothness.

Long service-life

A ceramic blade offers you several cutting-edges which ensure its very long service-life.

The 0° cut of the ceramic blade prevents the deburrer from cutting too far into the material. Material removal is uniform, without any risk of deterioration to the workpiece to be deburred.
